Technical Lead at Azend Technologies

Wayamba University of Sri Lanka
Bachelor of Applied Science

in

📖 SUMMARY

Strongly skilled .NET developer currently working as a Tech Lead who has 9+ years of industry experience with comprehensive knowledge in analysis, design and development of complex, highly available, scalable web client-server and n-tier applications. Always willing to keep updated by experimenting with new technologies and like to take ownership of core components, and new challenges with a can-do attitude. Good team player and solution finder who has impressive problem-solving and critical thinking skills.

💼 PROFESSIONAL QUALIFICATIONS

Tech Lead

Present August 2021	1 Year	Azend Technologies.

Associate Tech Lead/Senior Software Engineer

July 2021 July 2018	3 Years	Trabeya (Pvt) Limited.

Senior Software Engineer

July 2018 July 2017	1 Year	J-eTECH International (Pvt) Limited.

Software Engineer

July 2017 July 2015	2 Years	Programus Lanka (Pvt) Limited.

Software Engineer/Associate Software Engineer

July 2015 November 2013	1.5 Years	Kalusudda.

🎓 ACADEMIC QUALIFICATIONS

BSC (Hons) in Applied Science

2012-2013	Wayamba University of Sri Lanka. Majoring Computing and Information Systems as Major Stream and Majoring Mathematics & Mathematical Modeling as Second Major.

GCE A/L

2017	Mathematics-C Physics-C Chemistry-C	Isipathana Collage

🌐 EXTRA-CURRICULAR ACTIVITIES

Sports

Boxing	Junior National Champion(2006) Boxing Captain Isipathana Collage(2006/07) Boxing Captain Wayamba University(2011/12) Associate Boxing Coache Isipanatha collage(2007-2010) Associate Boxing Coache St. Joseph's college(2015/16)
Wrestling	Team Member - Wayamba University(2011/12)
Rugby	Team Member - Wayamba University(2011/12)

CORE COMPETENCIES

AZEND TECHNOLOGIES

HLC NAVIGATOR

TRABEYA (PVT) LIMITED.

BANGTAIL
&
EZYFLIGHT

J-ETECH INTERNATIONAL (PVT) LIMITED.

TOWNSUITE

👤 PROFESSIONAL EXPERIENCE

CORE COMPETENCIES

- Working as a member of scrum team in a fully agile environment. played a leading role in the company by providing leadership and mentoring juniors and other engineering team.

- Code reviewing, Technical Specifications, R&D, Client Support, and Issue fixing.

- Involved in most core developments in new modules and modifications to existing modules to deliver bug-free, optimized, standard and word class solutions.

- Working closely with other senior members to plan, design and find the most suitable technical solutions for the implementation.

HLC Navigator, a web-based learning management application.

Client Confidential History is a module which introduces gathering students' information. This project consists of a legacy windows application and a web application.	Tech Lead

BangTail is a web-based application to implement a livestock management system for the largest integrated cattle and beef producer in Australia. The developed system integrated the forefront of the supply chain of the company through which twenty-three cattle stations benefited. This project's main modules were Animal Movement, Animal Treatment and Management and Data Synchronization across the multiple stations.

EZYFLIGHT is a complete web and Internet Booking Engine (IBE) for Radixx clients, integrated with the Radixx Air PSS. It includes flexible design, a state-of-the-art multi-lingual website and content management, online flight booking engines (desktop and mobile), ancillary product sales, multiple payment solutions, social media integrations etc.

Data Synchronization module, establishing data consistency between two or more databases, automatically copying changes back and forth.	LEAD DEVELOPER
Movements module of the application records all the animal movements across multiple cattle stations ensuring data deduplication, verification and exception handling.	LEAD DEVELOPER
The device integration module supports the connection of various devices to the application providing the user with the ability to identify animals, calculate animal weights etc.	TEAM MEMBER

TownSuite Municipal Software is a municipal technology company that builds simple, powerful software focusing solely on local government.

The seating Chart module of the web application easily designs interactive seating charts which support reserving of seats for events and support in the ticket sales.	LEAD DEVELOPER
Overall involvement in the implementation process of the web application. Supported in development main features such as Citizen Registration, Billing etc.	TEAM MEMBER

PROGRAMUS LANKAS (PVT) LTD.

SALSTAR CONNECT
&
OPTIMO

Salestar connect is one of the leading solution providers for the telecommunication and mobile phone industry in the United Kingdom.

Optimo is the world's first fully integrated software platform for managing venues, events, facilities and resources.

Online booking system for facilities management; especially implemented for booking of meeting rooms and sports arenas, for clients in the Middle East, Australia and Europe.	LEAD DEVELOPER
A solution that revolutionizes how telecom industry businesses manage their commissions.	LEAD DEVELOPER
Developed for retail businesses of any scale; B2B businesses, distributors, or franchises. The Salestar connect customer management software integrates with other key Salestar connect solutions to manage customers.	TEAM MEMBER
